

Check Your Natural Gas Piping

The City of Ellensburg regularly inspects its underground natural gas pipelines up to your meter to make sure they are safe. If you own buried piping, such as piping to pools, hot tubs, BBQs or detached buildings, it is your responsibility to maintain the piping. If it is not maintained, it may leak or corrode.

Have a licensed plumbing contractor conduct an inspection and make any necessary repairs. Please call the Natural Gas Division at 962-7124 if you have any questions. And if you smell gas dial 911!
