

Natural Gas:

THEN &

NOW

*Natural gas never
goes out of style!*

2015

American Public
Gas Association

Energy-Saving Tip

Partially thaw frozen foods in the refrigerator before cooking them.

Natural Gas *Cooktops*

Greater precision, even heat, instant on/off...it's no surprise that 9 out of 10 chefs prefer the pro-quality features of a natural gas range. But ever since the appliance's debut, it has been just as embraced by everyday cooks, resulting in a wide fan base.

Energy-Saving Tip

Set your gas water heater to 'Pilot' if you're leaving home for two days or longer.

Natural Gas Tankless Water Heaters

Comfort is timeless. So is value. And both contribute to making a natural gas tankless water heater one of the most buzzed about appliances to ever hit the market. Throw in first-of-its-kind heating capabilities and 20+ years of lasting power, and the future of this technology is only looking brighter.

Energy-Saving Tip

Natural gas can cost up to 50% less than gasoline or diesel at the pump.

Natural Gas *In-Home Fueling Stations*

While natural gas appliances have a history of breaking the mold, few have been as ahead of their time as in-home fueling stations. This exciting new technology allows owners of natural gas vehicles to fill up from their garage, providing a level of convenience and innovation that just may help transform the future of transportation.

Energy-Saving Tip

Clean your dryer's lint filter before each load.

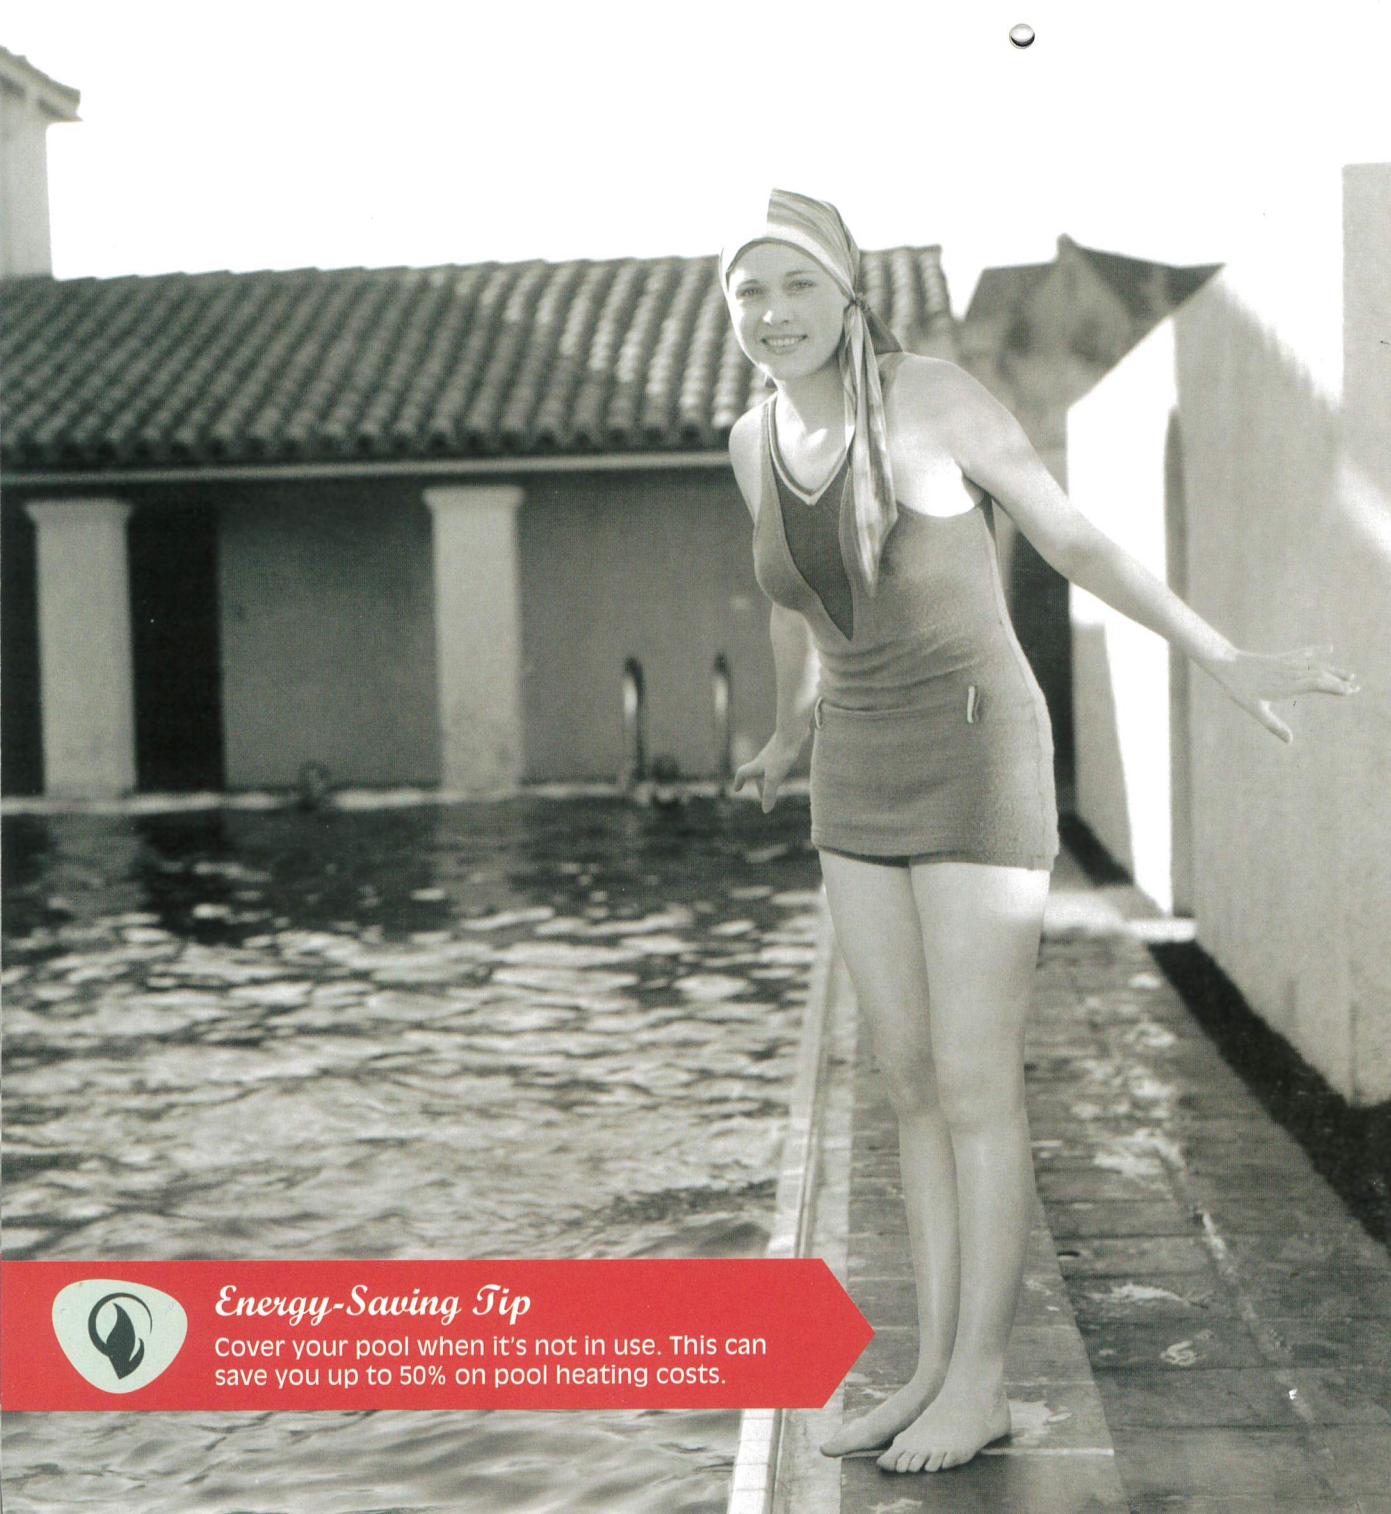

Natural Gas

*Clothes
Dryers*

Wrinkle-free clothing is forever in vogue. On top of reducing wrinkles automatically, natural gas dries clothes nearly twice as fast as non-gas dryers. It's also gentler on fabrics, which helps wardrobes withstand the test of time.

Energy-Saving Tip

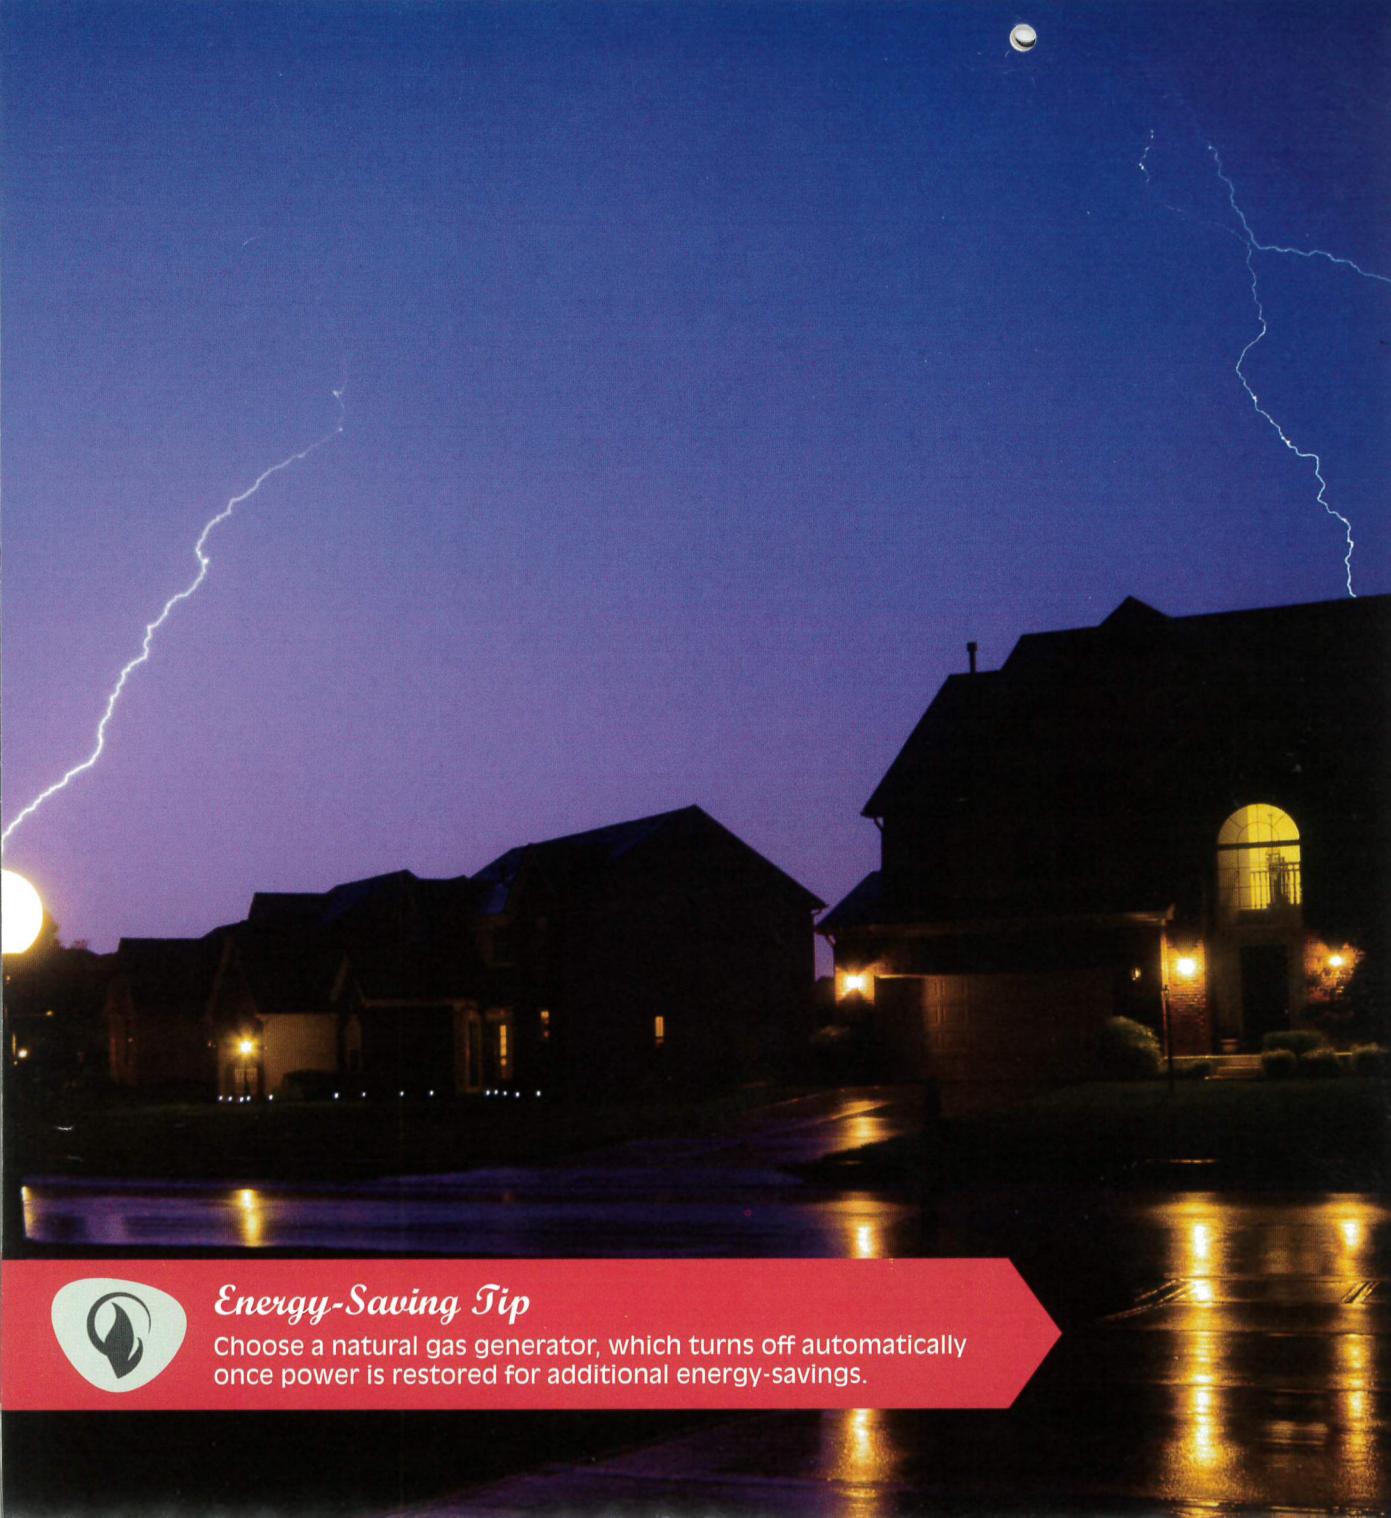

Cover your pool when it's not in use. This can save you up to 50% on pool heating costs.

Natural Gas *Pool/Spa Heaters*

Why have natural gas pool/spa heaters made a splash in the appliance world? For one, they cost far less to operate than non-gas heat pumps. They also save major time and energy, making it easier than ever to swim during all seasons.

Energy-Saving Tip

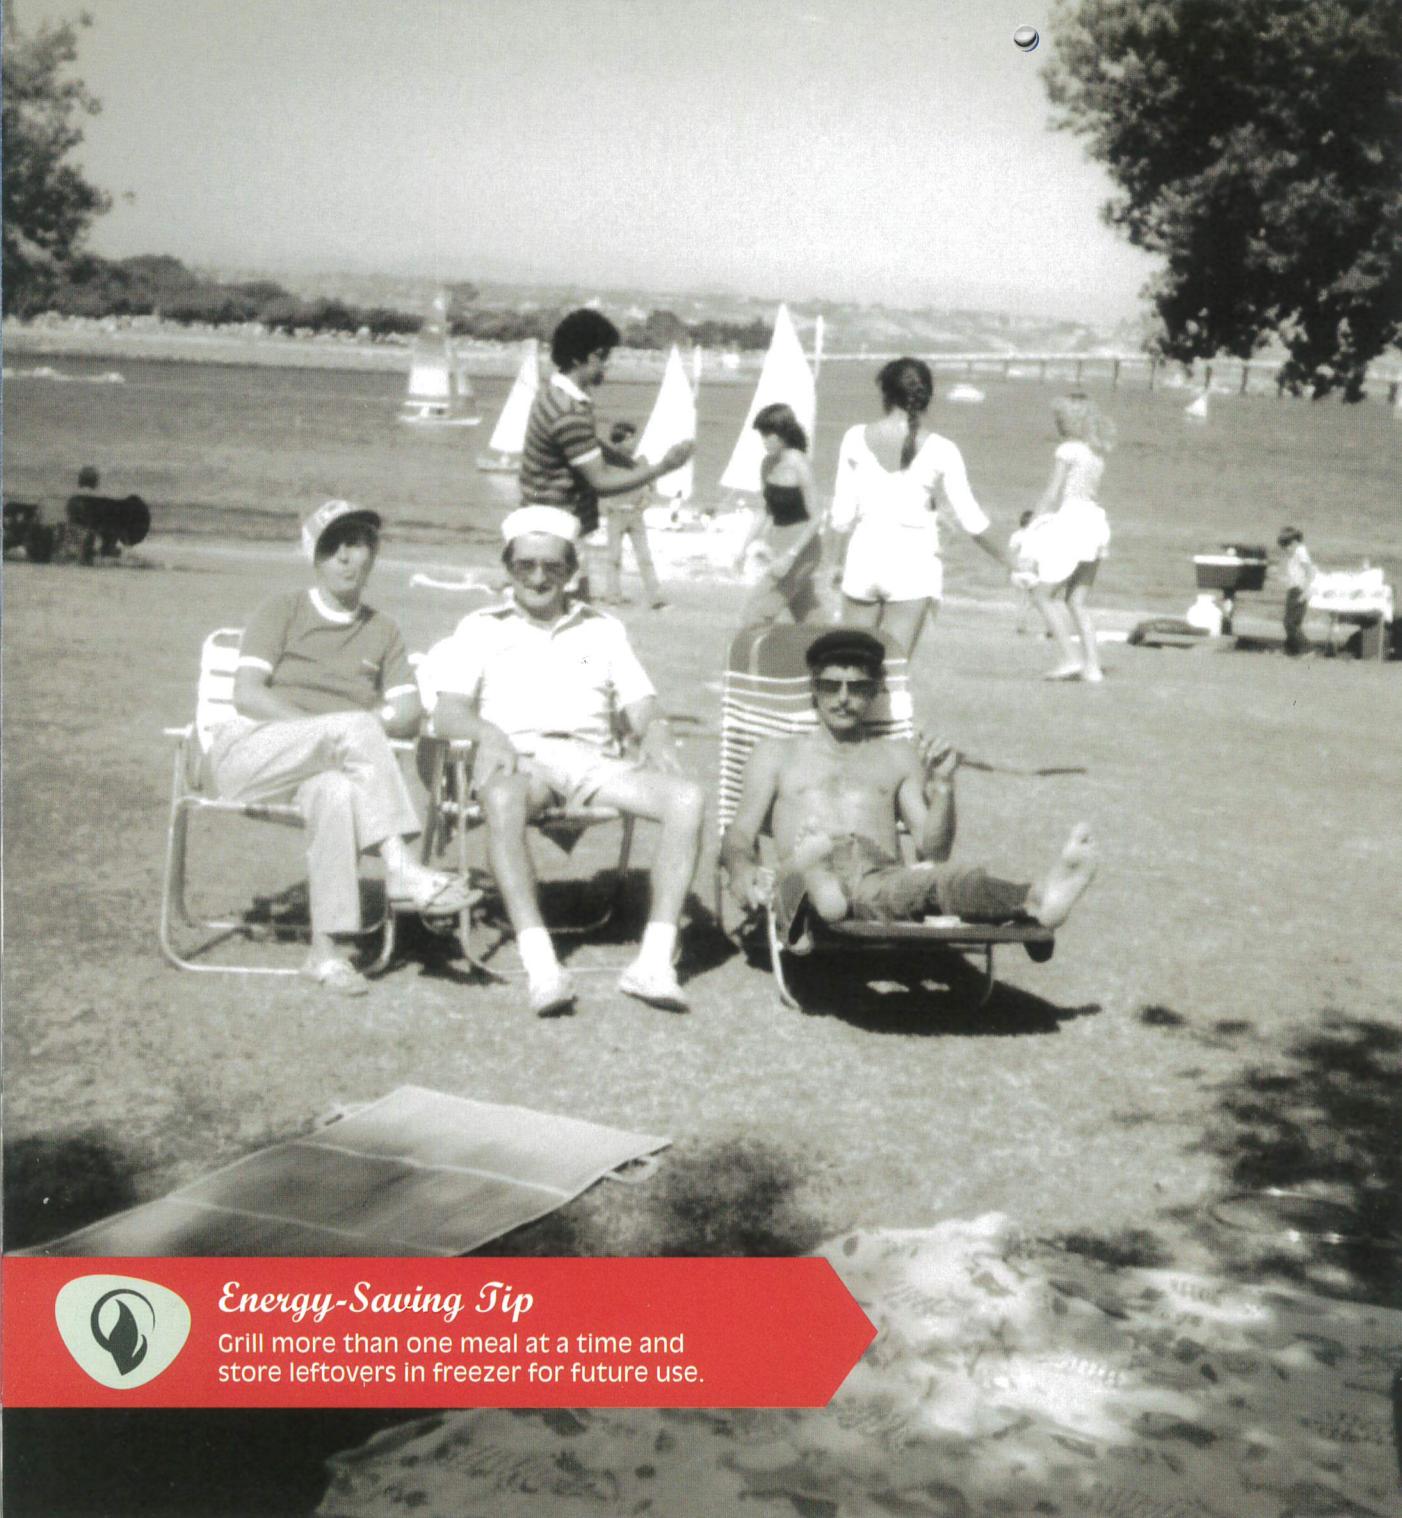

Choose a natural gas generator, which turns off automatically once power is restored for additional energy-savings.

Natural Gas *Generators*

Severe weather has wreaked havoc on humankind since the beginning of time. Fortunately, in this day and age, the right technology can make storm survival seem like a breeze. Take a natural gas generator, which turns on automatically and powers homes within seconds of an outage. It also costs up to 50% less to operate for even greater peace-of-mind.

Energy-Saving Tip

Grill more than one meal at a time and store leftovers in freezer for future use.

Natural Gas *Grills*

From the early twentieth century on, outdoor barbeques have taken their place among America's greatest summer staples. But why stop with an outdoor grill? Turn your backyard into a culinary oasis with outdoor kitchens and professional-grade pizza ovens.

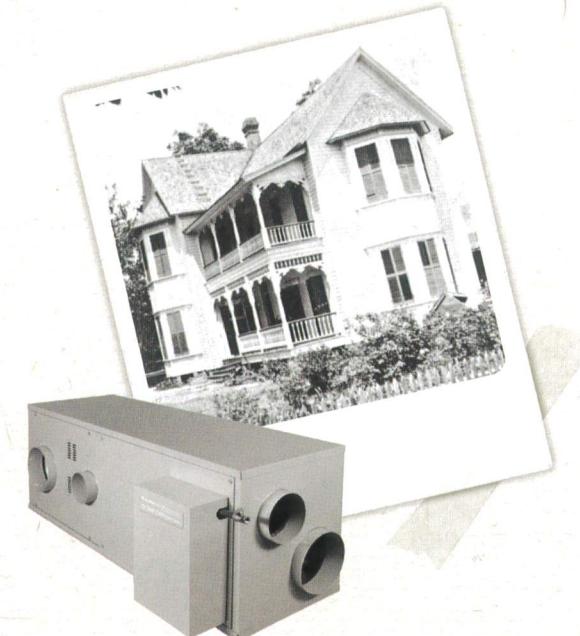

Energy-Saving Tip

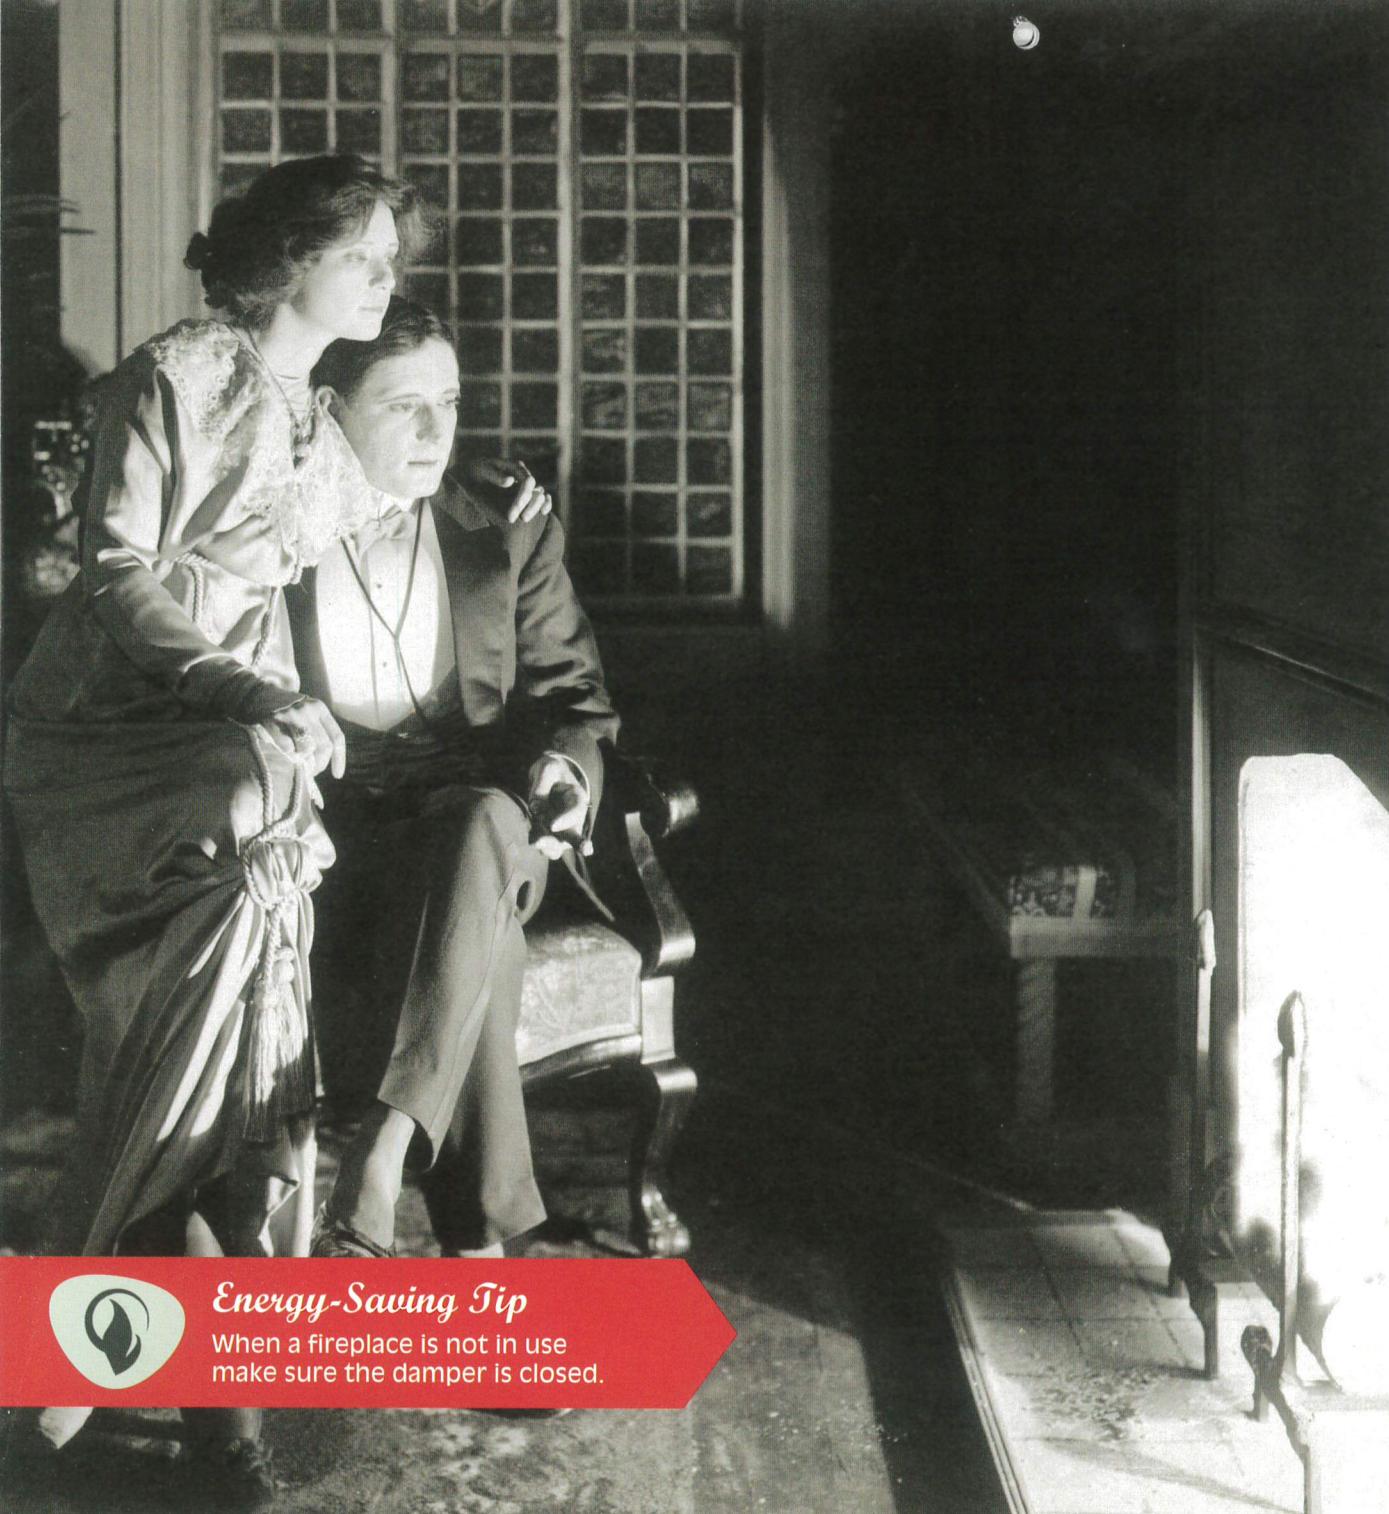

Keep windows and doors closed to prevent heated/cooled air from escaping.

Natural Gas *Desiccant* *Dehumidifiers*

Natural gas desiccant technology works to reduce the level of humidity in the air which eliminates mold, fungus and dangerous bacteria. Bonus benefit? The appliance also takes a sizeable energy load off the AC.

Energy-Saving Tip

When a fireplace is not in use
make sure the damper is closed.

Natural Gas Fireplaces

Back in the day, the primary purpose of a natural gas fireplace was to provide functional heat. Today, the versatile appliance is just as much about making a statement. Ultra-modern options include vented, dual-sided and even tabletop models that double as works of art.

Energy-Saving Tip

Keep the patio door shut to prevent heated air from escaping.

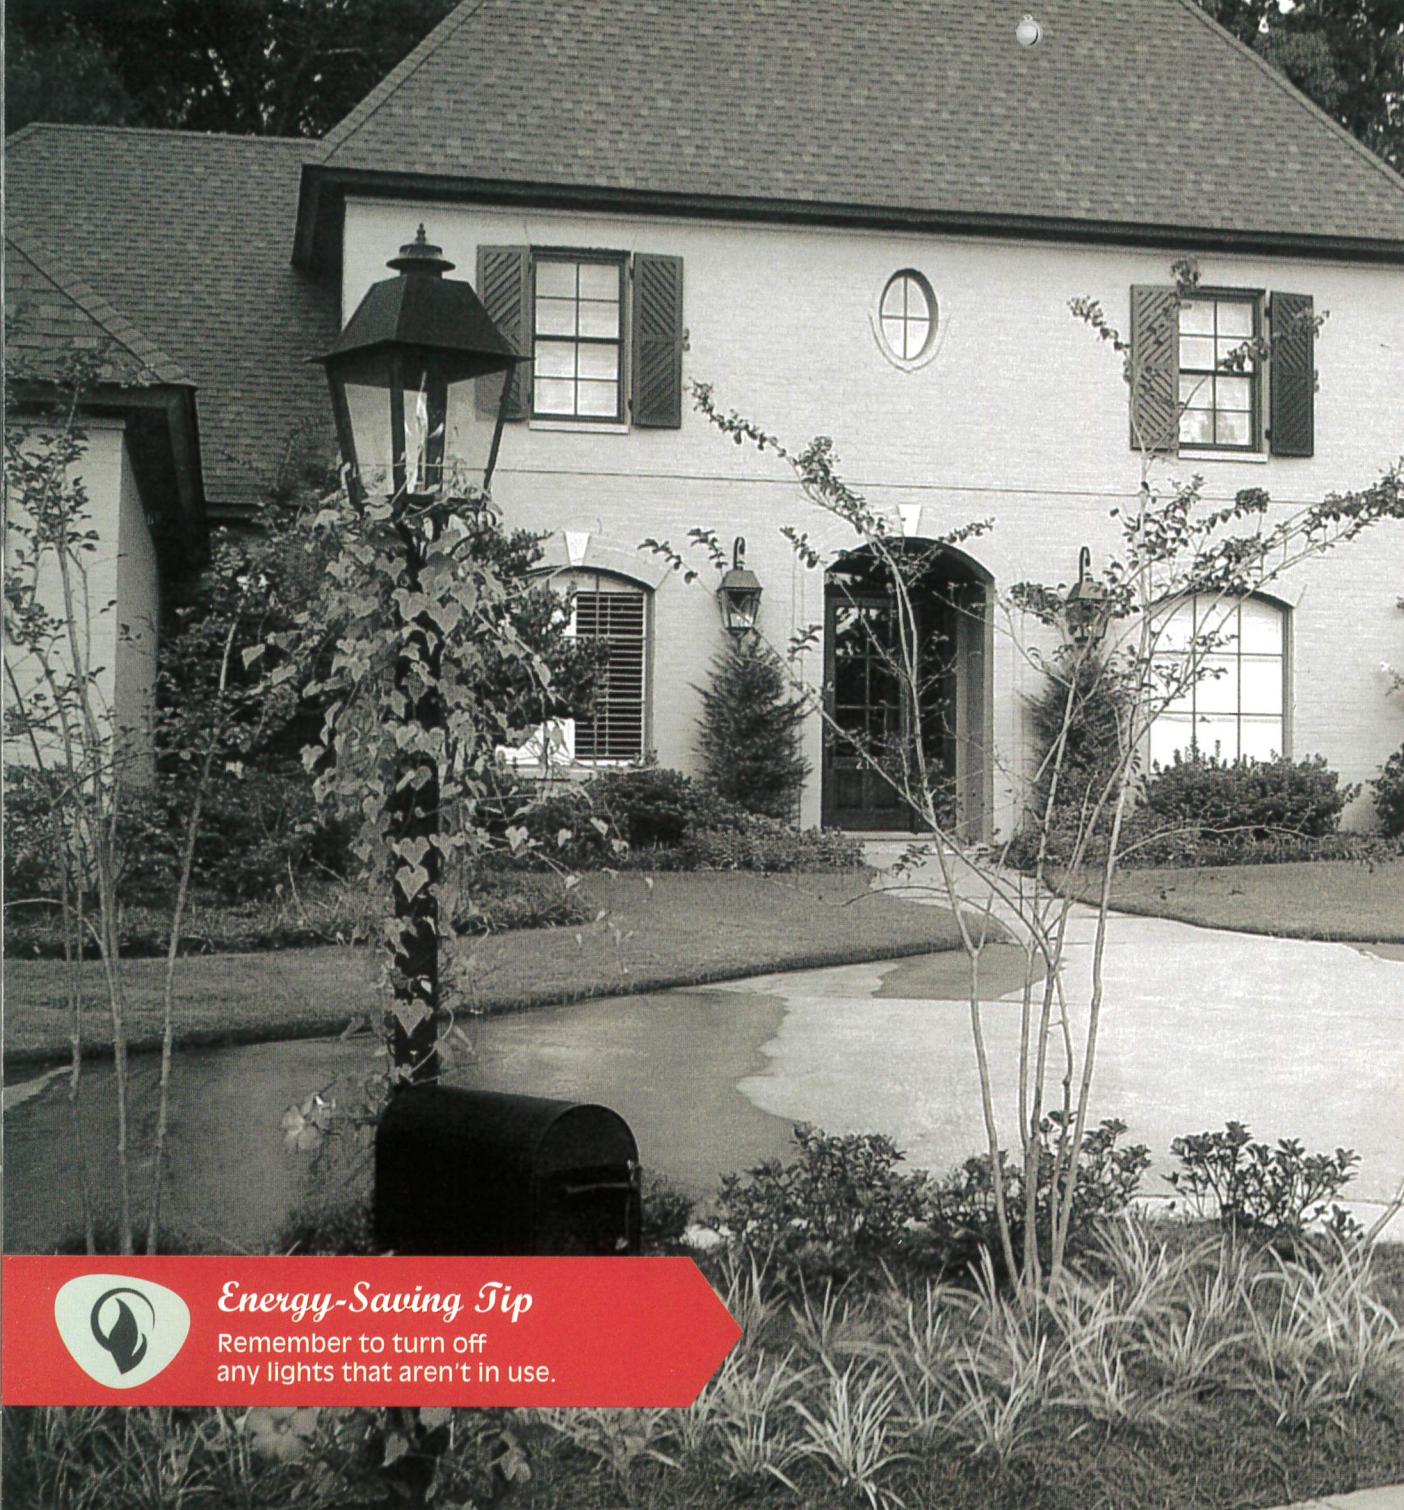

Natural Gas

*Patio
Heaters*

Decked-out backyards and patios are becoming all the rage. And since natural gas patio heaters work faster, cost less to operate, and heat up to a 20-foot radius—a little cold weather doesn't have to stop you from getting the most out of your outdoor space.

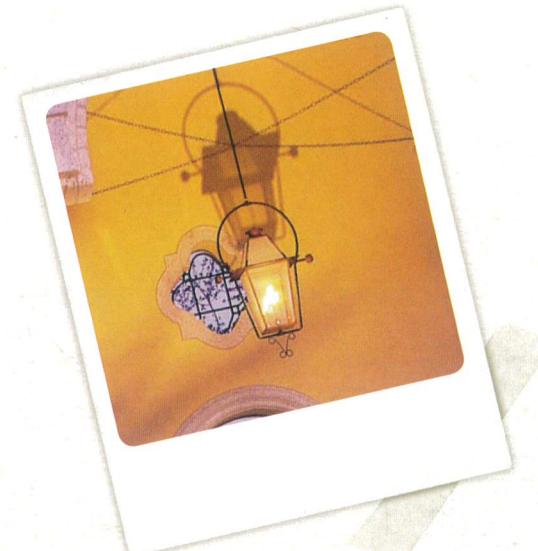

Energy-Saving Tip

Remember to turn off any lights that aren't in use.

Natural Gas
*Outdoor
Lighting*

Outdoor lighting is etched in history as the first natural gas application to hit the streets of the U.S. Fast forward to present day and the variety of styles and designs is about as endless and eclectic as the human imagination, but its collection of simple charm and functional beauty remains unchanged.

Energy-Saving Tip

Clean or replace dirty AC and/or furnace filters every couple of months.

Natural Gas *Furnaces*

Originally referred to as "heating stoves," natural gas furnaces have come a long way since their American debut. In fact, today's models are up to 95% efficient. They also take comfort to the next degree by eliminating drafts, helping to improve air quality and providing quicker, warmer heat.
